STOCK PRICES TRIFLE BETTER

Considerable Buying by the Bears in Covering Operations in Specials.

MARKET IS PROFESSIONAL

FINANCIAL SITUATION STEAD-ILY IMPROVING.

New York, Dec. 27.-Prices of stocks had a comprehensive and substantial rally today and the volume of the market expanded considerably. The increased business was poorly distributed and was concentrated in the favorite D. L. & W. stocks of the speculative element, indicating the professional source of much of the buying. The demand was generally ascribed to covering operations by the bear element, which has sold the market freely during the high money period of the last few days. One of the houses making the largest purchases of stocks today advised its customers against short sales at present on the ground that the intended liquidation would be withheld from the market wherever possible, until money becomes easier after the first of the year. There was some active support in the market and the desire to help market values of securities for the showing in yearly balance sheets as of Dec. 31 was be-lieved to furnish the motive for some of this support.

Some of the day's incidents offered Some of the day's incidents offered Preferred cositive factors toward a betterment of Nat. Lead entiment. One was the falling off, in N. the premium on currency and the inference of a subsidence of the demand in that field. The figures of the week's currency movement offered corroboration for this inference. The shipments of currency to the interior by the banks were less than last week, and P. C. C. & St. the transfers to other points through P. Steel Car. the sub-treasury were decidedly the smallest for any week since the financial disturbance set in.

In consonance with these control of Rep. Steel the Bank of England secured all of Rep. Steel 2d Preferred at a recession from the preceding market price. This had an encouraging effect on London sentiment toward American affairs. London was encouraged also by a subsidence of the demand for gold on German account and a recession in the private discount rate in Berlin further quieted apprehension regarding the position at that point. The Imperial bank of Germany made some accession to its gold holdings for the week, but showed a heavy expansion of note issues and of credits. The weak. Its decline in percentage of reserve to liabilities from 45.90 to 40 per cent compared, however, with a decline from 38.50 to 37.12 per cent in this week last year. By reason of the continued inflow of gold this week and of large payments to the sub-treasury, together with the diminished movement to the to have gained upward of \$3,000,000 cash Western Union W. & L. E. interior, the New York banks appear West. Electric tial reduction in the deficit is promised, therefore. The sub-treasury payments reflect in part the current deficit in the government revenues, the excess of government expenditures over receipts for December thus far having reached \$6,- Int. Met. ...
479,157, compared with an excess of Preferred 479,157, compared with an excess of receipts over expenditures in the corre- Sloss Steel sponding period of last year of \$7,297,-

It is this course of the government revenue operations which keeps alive the question of an early necessary draft by the treasury on the deposits with the national banks. An excellent impression was made by the insignificant withdrawals of savings banks deposits which have followed the expiration of the sixty-day period of notices required It is this course of the government revenue operations which keeps alive which have followed the expiration of the sixty-day period of notices required at the time of the runs on the New York trust companies. Withdrawals now 13.00@13.12%. would forfeit the six months' interest due at the end of the year, and the short period yet to expire of that period is believed to have helped toward keeping down the withdrawals of de-

A sharp reaction in foreign exchange rates marked the cessation of demand against gold engagements abroad. The week's exports of wheat and corn also rose to the largest figures for the present season. The gains in prices of stocks were nearly all maintained in spite of a late rise in money rates. Bonds were steady. Total sales, par

value, \$1,913,000. United States bonds were unchanged

HEAVY HOLIDAY TRADE.

Otherwise Business in All Lines Is Exceedingly Quiet.

New York, Dec. 27.-R. G. Dun & Co.'s Weekly Review of Trade tomorrow will

weekly keview of the say:

Holiday trade was very heavy during the last few days before Christmas, raising the total for the season above expectations, although comparisons with last year's figures are unfavorable at most points. General business has been quiet, as is customary at this time, and manufacturing plants have increased the percentage of idle machinery. Dry goods jobbers stimulated trade by special clearance sales. Washington, Dec. 27.—Today's statement of the treasury balances in the general fund shows:
Available cash balance \$267,938,162
Gold coin and bullion 33,465,460
Gold certificates 61,868,760

New York, Dec. 27.—Coffee futures closed quiet, net unchanged to 10 points lower. Sales were reported of 11,000 bags, including: February, 5.65; March, 5.75; May, 5.85; September, 6.05. Spot, quiet; Rio No. 7, 61-16; Santos No. 4, 8; mild coffee, quiet; Cordova, 94/2013.

Sugar—Raw, quiet; fair refining, 3.302/3.35; centrifugal 96-test, 3.85; molasses sugar, 3.002/3.05; refined, quiet. ance sales.

The banks furnished currency more readily for pay-rolls. But little improvement is recorded in mercantile collections. More wage-earners are unemployed than at any previous time this year. In many factories and mills announce resumtion early in 1908, and connounce resumption early in 1908, and connounce for the preceding extended period of full occupation.

A large percentage of the nation's iron

savings of the preceding extended period of full occupation.

A large percentage of the nation's iron and steel producing capacity has closed down until Jan. 1, and in a few cases quotations are lower, but there is confidence in an early resumption of activity. Restoration of normal conditions is based on the knowledge that stocks are low in all positions, and the belief that financial conditions will be sufficiently improved to encourage new undertakings and the completion of work on abandoned extensions and improvements. Textile production has been curtailed still further through concerted action by New England cotton spinners, and diminished output, together with the absence of any effort to force sale, has sustained quotations.

Hides are quiet. Stocks have accumulated and tanners believe that better terms may be obtained by delay.

SALAIN AND PROVISIONS.

Chicago, Dec. 27.—Favorable conditions for harvesting in Argentina caused a decline of more than one cent in the price of wheat here today. At the close wheat of what delivery was one cent below the final quotation of yesterday. Corn and oats were each unchanged. Provisions were a shade higher to 2½c lower.

The wheat market was inclined to be wask all day, with the exception of a short period in the first hour, when prices advanced nearly one cent from the lower point of the day on buying by shorts, which were based upon a report that the total acreage in India will be \$,000,000 less than that of the last crop.

Later in the day selling became general on numerous reports of favorable weather in Argentina. An increase in local receipts also depressed the market. The close was weak. May opened ½g%c to %dilled to 1.05%. Edmonton*

Long of wheathers to 2½c lower.

The wheat market was inclined to be wask all day, with the exception of a short period in the first hour, when prices and vanced nearly one cent from the lower point of the day on buying by shorts, which were based upon a report that the complete of the last crop.
